I have known Harjee Gandhi for over 15 years now. They take co-ownership of each assignment and deliver with quality and speed. He keeps us abreast with new technology and development in industry and proactively drives for innovative and effective solutions. At Louis Vuitton we started with doing VM animations of our windows and other assignments and he has always acted as true partner.

Neeraj Walia
Retail Manager Louis Vuitton -India
Formerly, General Manager Sales-McCain Foods

Mr.Harjee and his team are extremely professional when it comes to conceptualizing thoughts and for any display requirement led fabrication. We are working from past 4 and there has not been a day when we had to complain about their professionalism. They value both time and money and deliver the goods within the stipulated deadline. The same can be said about their pricing policy. They are extremely competitively priced w.r.t quality. I am extremely satisfied with the way you conduct your business.

We have worked in the past and the best thing in them is their work does not require constant supervision. They are a team of professionals who always look to streamline procedures to improve efficiency & customer service. They even provide meaningful information/innovation to decision makers that help in finalizing deliverables. They set priorities and adjust them as needed when unexpected situation arises, something that the industry lacks. We wish them all the very best and look forward to work together.

Have found HG Graphics team as very professional and committed. I remember an instance where we had a problem site specific with the ACP façade loosened up due to the wind pressure, where initially there was no proper support due to glass façade, but as soon same was intimated to you immediate action was taken with a permanent fixing solution and all wiring covered up properly in pvc sleeves / conduit pvc pipes. Surely would like to be associated and work with you guys in our future projects.
